PROFESSIONAL SUMMARY

Motivated **WordPress and Frontend Developer** with a strong foundation in HTML, CSS, JavaScript, and modern React development. My development journey began with HTML and CSS, progressed into WordPress development, and later expanded into JavaScript and React.

Through personal and real-world projects, I have developed practical experience creating responsive interfaces, customizing WordPress websites, building interactive web applications, integrating APIs, and structuring frontend applications with reusable components.

I enjoy transforming ideas and designs into functional, responsive, and user-focused digital experiences. I am particularly interested in opportunities where I can contribute my WordPress and JavaScript skills while continuing to grow as a professional software developer.

TECHNICAL SKILLS

Frontend Development

- HTML5
- CSS3
- JavaScript (ES6+)
- TypeScript
- React.js
- React Router
- Responsive Web Design
- Component-Based Architecture

- REST API Integration

WordPress

- WordPress Website Development
- WordPress Theme Customization
- Elementor
- Website Layout & Customization
- Responsive WordPress Design
- Website Content Management

Development Tools

- Git
- GitHub
- Visual Studio Code
- Vite
- npm
- Axios
- Chrome DevTools

Additional Technologies

- Tailwind CSS
- Bootstrap
- Node.js
- Express.js
- PostgreSQL
- Prisma ORM

DEVELOPMENT JOURNEY

From HTML & CSS to Modern Frontend Development

My journey into web development began with **HTML**, where I learned the fundamental structure of websites and how different elements work together to create web pages.

I progressed to **CSS**, where I developed an understanding of layouts, responsive design, styling, positioning, and creating interfaces that work across different screen sizes.

After establishing my HTML and CSS foundation, I explored **WordPress**, gaining practical experience building and customizing websites and understanding how WordPress can be used to create websites efficiently for individuals and businesses.

I later shifted my focus toward **JavaScript** to gain a deeper understanding of programming and web application development. This introduced me to programming logic, DOM manipulation, events, asynchronous programming, APIs, and interactive user experiences.

After strengthening my JavaScript skills, I returned to complete my WordPress development journey while continuing to improve my JavaScript knowledge. I subsequently progressed into **React**, where I began building more sophisticated and scalable frontend applications using reusable components and modern development practices.

This progression has given me a broad understanding of both traditional website development through WordPress and modern application development using JavaScript and React.

SELECTED PROJECTS

Cartify — Smart Student Marketplace

Technologies: React, TypeScript, Tailwind CSS, Node.js, Express.js, PostgreSQL

A campus-focused marketplace designed specifically for university students to safely buy and sell products.

- Developing separate **Buyer, Seller, and Admin modules**.
- Implementing role-based authentication and authorization.
- Designing responsive marketplace interfaces using React and TypeScript.
- Building product discovery, search, filtering, product details, and marketplace workflows.
- Planning student verification and escrow-based transaction protection.
- Designing a scalable frontend architecture for future backend integration.
- Exploring real-time communication between buyers and sellers.

Project Type: Full-Stack Web Application

Movie Discovery Web Application

Technologies: React, TypeScript, CSS, REST API

A movie discovery application built around a third-party movie API.

- Built reusable React components for displaying movie information.
- Integrated external REST APIs to retrieve movie data.
- Implemented movie search and category-based browsing.
- Created responsive interfaces for different screen sizes.
- Applied React Router for multi-page navigation.
- Worked with asynchronous API requests and application state.

Project Type: Frontend Web Application

Personal Developer Portfolio

Technologies: React, TypeScript, Bootstrap, CSS

A personal portfolio website created to showcase my development skills, projects, experience, and technical journey.

- Designed and developed a responsive developer portfolio.
- Created reusable React components.
- Implemented responsive navigation and structured portfolio sections.
- Presented projects and technical skills through a professional interface.
- Deployed the website for public access.

Project Type: Personal Portfolio

WordPress Websites

Technologies: WordPress, Elementor, HTML, CSS

Developed and customized WordPress-based websites while learning how to translate website requirements into practical digital experiences.

- Created and customized website layouts.
- Worked with WordPress page-building workflows.
- Customized website sections and visual components.
- Focused on responsive layouts and user-friendly interfaces.
- Applied HTML and CSS knowledge to improve website presentation and structure.

Project Type: WordPress Development

EDUCATION

Osun State University (UNIOSUN)

Bachelor of Science (B.Sc.) — Software Engineering
Nigeria | [2028]

Relevant areas of study include:

- Software Engineering
- Programming
- Computer Science
- Web Development
- Database Systems
- Computer Logic & Design
- Mathematical Methods
- Embedded System and IOT

PROFESSIONAL STRENGTHS

- Strong problem-solving and logical thinking
- Continuous learner with a strong interest in software development
- Aspiring Embedded System and IOT
- Ability to learn new technologies independently
- Strong attention to user interface and user experience
- Comfortable working with modern frontend technologies
- Ability to translate ideas and designs into functional interfaces
- Interested in writing maintainable and reusable code
- Willingness to learn from experienced developers and collaborate within a team

---

DEVELOPMENT & COLLABORATION

- Git & GitHub version control
- Component-based development
- API integration
- Responsive web development
- Debugging and browser developer tools
- Project-based learning
- Independent research and technical problem solving

ADDITIONAL INFORMATION

Role Target: WordPress Developer / JavaScript Developer / Frontend Developer

Availability: [24/7]

Location: Osogbo, Nigeria

Work Preference: [Remote / Hybrid / On-site]
